

BACK TO A GREEN FUTURE[®]

The Monthly Newsletter

Progressive building practices, monthly news, local events and useful tips for energy efficient, renewable and sustainable building solutions compiled by Northpoint Construction Services in Chicago!

Insulation from Greenmaker Building Supply

We share with our readers, topics such as energy/utility cost-saving solutions, Green building materials and appliances, air leakage solutions, indoor air quality, energy ratings, recycling, greenroofs, ventilation, heating and cooling, solar energy, various precast panel systems, green gardening, radiant flooring, water quality, the LEEDS Accredited Professional (AP), Energy Auditors, retrofitting, City, State and Federal funding opportunities, plus the newest technologies in Green construction.

We will regularly inform you about Chicagoland's many Green events, such as trade shows, festivals, conferences and seminars, with dates and event descriptions.

building practices for new construction, rehab and renovation projects for residential, commercial and industrial clients.

Our services include contracting, project management, design/build collaboration and owner representation.

www.backtoagreenfuture.com

Our current construction case history projects will provide additional Green info and practices that you can use and share with friends and associates.

We are Chicago builders with a combined 45 years of professional construction

www.nptcs.com

We are also WBE and MBE certified with City, State and Federal agencies, members of United States Green Building Council and are aspiring LEEDS APs, with certification forthcoming late this summer 2008.

Please talk to us about project, Energy Auditors Architects and/or LEEDS APs. We can help you bring "Green" concepts into your home or workplace. Introduce "Green" into your design for high cost efficiencies, personal comfort and ecological solutions.
